Subject: Geoscience and Remote Sensing Letters - GRSL-00951-2023.R1

Body: Dear Mr. Garcia do Nascimento:

I am pleased to inform you that

GRSL-00951-2023.R1 Productive Crop Field Detection: A New Dataset and Deep Learning Benchmark Results

has been accepted for publication in the IEEE Geoscience and Remote Sensing Letters. It will be published in the next available issue.

The authors may want to consider joining the IEEE Geoscience and Remote Sensing Society. Besides the many advantages (access to the Journals and publications, discounts in conferences etc.), it is a way to recognize and be recognized as a member of this growing community. Please check <http://www.grss-ieee.org/about/membership/>

Below may be comments of the GRSL Editorial Review Board, which you should consider when returning your manuscript in its final form. Any attached files that may be referenced with these comments can be accessed in a copy of this decision letter located in your Author Center on ScholarOne Manuscripts.

The final version of your manuscript must comply with IEEE Periodicals requirements for text and graphics processing.

To submit final files, please log into your author center and click the "awaiting final files" queue. PLEASE DO NOT SUBMIT ANY FILES VIA POST, EMAIL, OR FAX. In addition to uploading your files, please check that the author-supplied data, such as contact and co-author information, is correct and complete.

The following items are required before your paper will be processed for publication. Failure to submit any item will result in publishing delays. Please be sure that all files are the final version, and that each item in the list below is included. Once you make your final submission, you will not be able to add or change files.

Kindly upload as soon as possible:

*A FULLY COMPLETED Microsoft Word version of the Author Acknowledgment form, which is attached to a copy of this letter and can also be found by clicking on the "Instructions and Forms" link on the ScholarOne Manuscripts homepage. This can be designated as a supplemental file during the upload process, and your typed name serves as an Electronic Signature. This form must be uploaded with the other final files. Please do not submit this form via fax or post, as it will not be processed if you do.

*A final camera-ready pdf version of the final manuscript. The accepted version of your manuscript will also be included with the files sent to production for comparison purposes, but a final camera-ready pdf should also be uploaded.

*A Tex, Latex, or Microsoft Word application file that exactly matches the final pdf file.

*A digital source file of the artwork in Word, Tiff, Postscript, EPS, Excel or Powerpoint.

Please make sure that all final files have unique file names in order for them to export successfully to IEEE

GRS has moved to an all electronic copyright submission system. After you have submitted your final files, a link for the ECF will appear in your author center. After clicking the link you will be brought through a series of questions, and will be able to download a confirmation of your ECF upon completion.

Please note that a pdf is NOT sufficient for publication. We must receive the source files of your text and figures to process your paper.

If you have any questions regarding the final submission please contact:

Chahat Gogia
Publications Review Coordinator, IEEE
grsl-editor@ieee.org

Failure to adhere to these guidelines will result in delays in processing the manuscript. Also, if submission is delayed for more than one year, we will need to begin the reviewing process all over again.

GRSL has instituted the following policy regarding payment of page charges of manuscripts accepted for publication by the Editorial Board:

(1) Payment of page charges for the first three printed pages is voluntary. The rate is \$110 per page. If these optional sustaining page charges are paid, one hundred free reprints of your article will be provided.

(2) A mandatory excessive page length charge of \$230 per page (beginning with page 4 and including page 5). Papers longer than 5 will not be considered but may be sent to TGRS for consideration. GRS Society members pay \$200 per page.

(3) GRSL will not print color figures unless your organization is willing to pay the printing costs. The cost is \$275.00 per figure. These charges are in addition to the normal overlength page charges.

(4) GRSL now offers the option to print in b/w and post figures online in color. Please be specific as to which color figures should appear where on your author acknowledgment form.

I look forward to seeing your paper in the publication.

Sincerely,

Dr. Avik Bhattacharya
Editor-in-Chief
IEEE Geoscience and Remote Sensing Letters

Associate Editor's Comments:

Associate Editor

Comments to the Author:

I would like to thank the authors for implementing the changes required by the reviewers. I recommend the paper for publication in the current format.
